# FIRST OF ALL...

## WHAT'S THIS?

This is a small plugin with which you can show a simple yet sleek system of Chapter signposts. Simple, but effective! Do you want to know how it works? Let's get to it!

---

# INSTALLATION

## THE MOST BASIC PART IN ANY SCRIPT

I guess you might be wondering “How on earth do I install this in my own game?”. So before moving on to how to control this script, let’s see how to implement it.

### 1. INSTALL SUSc:

Go to this [link](#) and install the latest version of SUSc plugin.

### 2. INSTALL this script:

- First, download the plugin kit using the link above.
- Extract the contents of the zip file into your game root folder.

**AND THAT’S IT!**

# USAGE

## THE MOMENT YOU’VE BEEN WAITING FOR

In order to use it, you just need to call **pbChapter(NUMCHAPTER,INTROTRANS,ENDTRANS,XPOS,YPOS)**, where:

**NUMCHAPTER:** Is the actual chapter to be displayed.

**INTROTRANS and ENDTRANS:** booleans. True if you want a fade to black respectively at the beginning and at the end. (Both optional. true by default).

**XPOS and YPOS:** position of the script on screen . (Both optional. 0 by default).

**Note:** You can customize different aspects of the plugin through the file “**[001] Chapters Settings.rb**”, inside the plugins folder.

### Examples:

- **pbChapter(0)** will call the chapter 0
- **pbChapter(2,false)** will call the chapter 2 without a fade to black transition at the beginning.
- **pbChapter(3,true,true,20,5)** will call the chapter 3 with fade, at position [20,5].

**AND THAT’S IT!**

---

## CONCLUSION

JUST FOR THE SAKE OF GIVING THANKS (and a small spam with my sites if I may)

And this is it for this version. If you have any problem don't hesitate to mail me at [somersault0023@gmail.com](mailto:somersault0023@gmail.com), or contact me via discord: **Somersault**#9770 (copy and paste it because you are not going to find me otherwise), and I'll be really glad to help you solve any problem with this or any other script.

I also invite you to check my [Deviantart](#) account as well as the site of a huge [Sinnoh fangame](#) my team and I are developing (in which this script features, by the way!)

With all being said, I would also like to give huge thanks to you. Exactly! Infinite thanks for downloading and playing with this. I really appreciate it. I really hope you like it and you enjoy it. Stay safe and best regards!
